Page 25, line 34, to page 26, line 2, as follows:

The encoder 1 sends 23 the information about the selected prediction method to the multiplexer 9, which is accompanied by displacement information if method P13 is used. Advantageously, the selected prediction method is indicated by its rank in the subset of prediction ~~mehtods~~ methods appropriate for the particular combination of neighbouring blocks (U, L) in question. Encoding of the information is advantageously performed using variable length coding.
